I strongly disagree with the National Association of Broadcasters attempt of stopping XM Satellite from providing services and programing that we PAY for through subscription fees. XM Satellite provides me with more program options than what AM or FM stations do. I still listen to local programing on AM/FM and do not see how they would be affected. If NAB are so worried about themselves then they should provide better programing instead of whinning about XM Radio. I feel that NAB's petition 04-160 be rejected. I am also contacting my representatives about opposing HR 4026.
